

Online Backup Services (Ahsay ACB and OBM Licenses)

Backup Your Business for Peace of Mind

Online Backup Services

We offer online backup services to conveniently and securely store important data at an offsite facility. Protect valuable information from getting into the wrong hands and free up your onsite storage space for day-to-day operations. Avoid a major disaster that could potentially cost hundreds of thousands of dollars to recover from. With our online backup services you will never have to worry about lost or misplaced files. Our backup software is fast and easy to use, without any pricy setup fees.

All data is encrypted and compressed before being uploaded and stored on servers at a level 1 connected data facility. The facility has an OC-12 redundant fiber optic connection to Internet backbone, with electronic surveillance systems for enhanced security, and is climate-controlled with a backup power generator in the event of a power outage.

FEATURES

- Simple to use software and administration options
- Self-explanatory installation process with comprehensive documentation for users and administrators
- Fast read/write speeds
- Virtually unlimited storage space that can be increased as your storage needs grow
- Peace of mind knowing your important files are safely stored and protected from deletion, corruption, theft, viruses, power shortages, software/hardware malfunction, and human error

Annual fees: (based on the amount of storage space required)

• 5 GB \$198.00	• 20 GB \$498.00	• 40 GB \$960.00	• 60 GB \$1440.00
