Sphere Website Package

✦ **Cost: \$5000.00**

Sphere is an innovative e-commerce management solution that is designed to facilitate businesses in expanding their markets. Sphere supports multiple languages and multiple currencies so that you can naturally sell your products virtually anywhere in the world. Backed by a dedicated and secure server, your business will avoid downtime due to heavy web traffic and your customers will feel confident and protected while placing orders.

Sphere provides consumers with numerous options regarding the products they buy. For instance, visitors can compare products, write product reviews, create wish lists (with comments) which they have the option to send to others, personalize products they purchase, re-order products quickly, and so much more. Ultimately, when it comes time for your customers to select the products they want to purchase Sphere makes online ordering quick and worry-free with a single-page checkout system.

Rest assured that when you choose Sphere, you are choosing a contemporary e-commerce solution that takes an interest in making online shopping easier and more convenient to the customer so that they will want to return often.

We will begin with a design meeting to develop several layouts including a custom home page and interior web page layout. We will ensure that the web page layouts match your company branding and corporate identity. In addition, client-provided website content (text, pictures and videos) is altered professionally by our design team before being inputted to enhance and suit the website layout.

We will input up to 5 web pages and 10 products of client-supplied digital content including web page copy (text), product descriptions, photography, images and media. Numerous additional interior web pages and products can be created with our virtually unlimited web page/product capacity. If your website requires the input of more than 5 pages of content or 10 products we can provide assistance charged on an hourly basis.

We will provide advanced application training at our location.
